Four user modes available

ATEX

DESCRIPTION

The Survivor Low Profile is a lightweight hand lamp with an angled head, designed for use in hazardous locations.

This ATEX hand lamp has a specially designed optic with optional interchangeable Smoke Cutter plugs for the desired light beam:

- Black plug significantly reduces peripheral light for a tighter beam
- Amber plug reduces peripheral light and eye fatigue caused by glare
- Without the use of a plug you get the traditional Survivor light beam.

There are four modes available:

- Full power - 41000 candelas - 175 lumens - 405m lighting distance - 3.5 hours
- Low - 14000 candela - 60 lumens - 237m light distance - 10 hours
- Moonlight - limited light output - 15 days
- Flashing light - 5 hours
